A child in New York is in danger of death, caused by meningitis, brought on by a violent blow on the ear.

The doctor in charge can el the arrest of the man giving the blow, as he says it is a dangerous and cruel practice to strike children on the head, on account of the thinness of their tender skulls, and he thinks an example should be made of this case. Many parents, however, use this hasty method of correcting their children who would be startled did they know the serious harm a merifal Providence only often prevents them from inflicting.—Broadway News.

Any one who can write an order for a harness from us as well as pay \$10 to \$20 for some middle man to deliver it for them. We give no credit, we have one price only. Why do you pay no profits on your carriage and harness? Why do you pay some one \$10 to \$20 for riding these things, when you can do it and save this money? You run no risk.
